The Amazing Shape-Shifting Kayak

Topic: [Sports](#)

Outdoor nuts who long for new ways to blow their disposable income are likely to get a bad case of gear lust after checking out newbie kayak maker Trak Kayaks. The company's initial offering, the T-1600, is the first kayak with the ability to change its hull shape.

Leave it as is, and it'll hit the water with a straight bottom good for paddling fast and straight on flat water. Give a few tugs on a hydraulic lever inside the boat, and the bow and stern flare up, giving you a flared keel line better suited for dealing with waves and moving water.

The whole thing packs down into a rolling backpack, comes in luscious pastel colors and sells for a steep \$5,575.
